

Support for Smooth Construction Control and Maintenance without Clarification for Manufacturing

Clarification of Welding quality

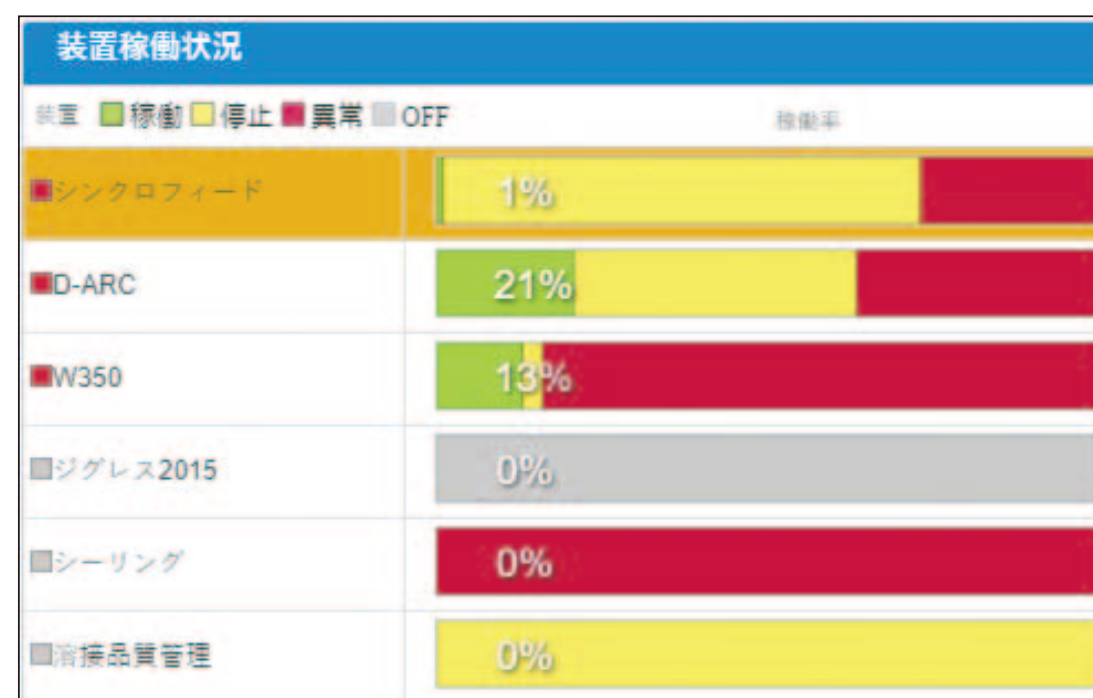

Tracing of detailed production data such as Welding current, confirming the products quality compared with mother facility.

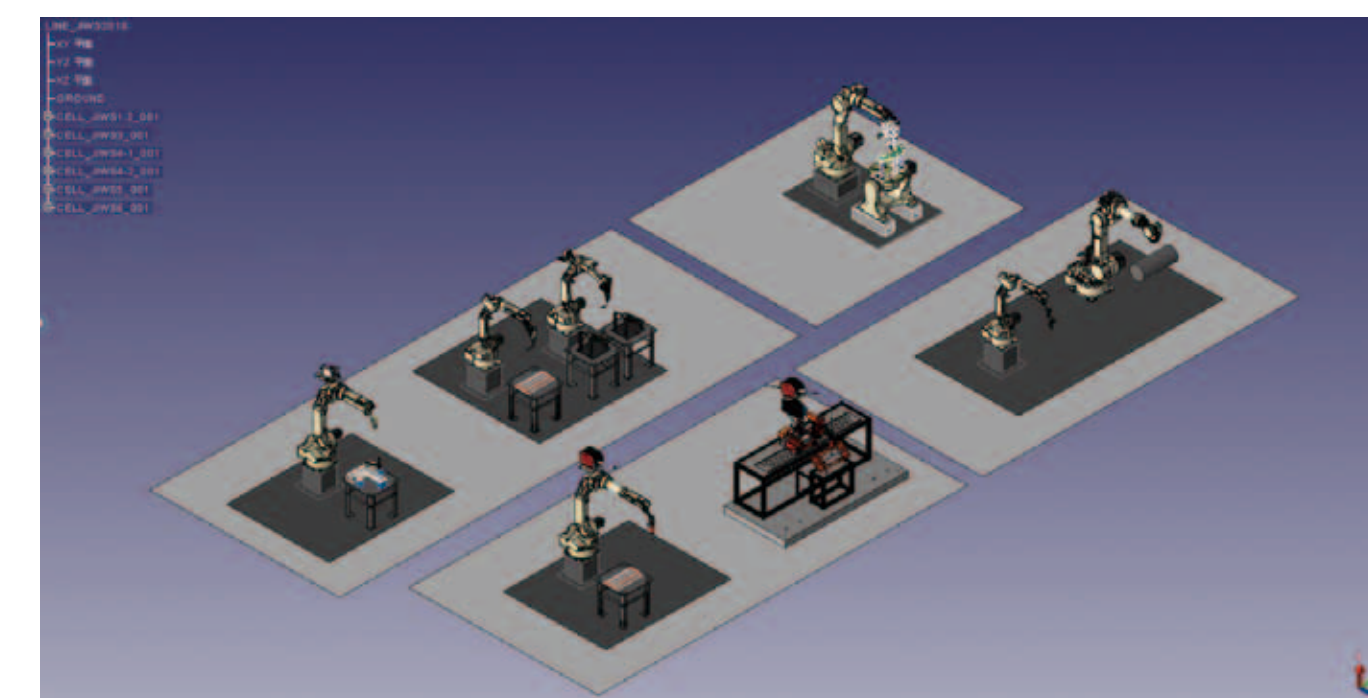

Welding waveform

Clarification for performing situation

Monitoring the robot performing situation at real time and grasping of product situation.

Robot performing ratio monitor

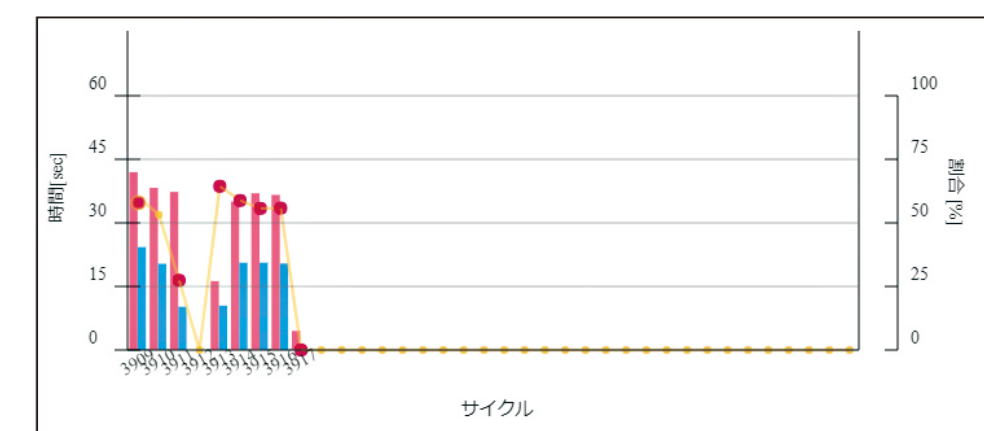

Robot performing monitor

Clarification for conservation information

Supporting the restoration from history information when welding trouble occurs.
Predictive maintenance of consumable parts replacement.
