

Reduces dependence on human skill for torch operations to enable anyone to achieve high-quality TIG welding

Reference

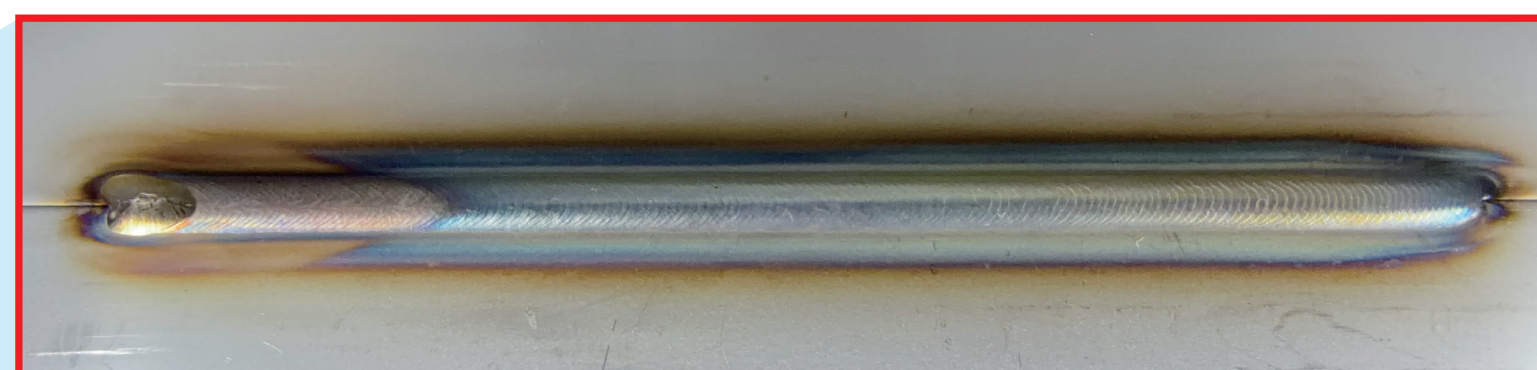

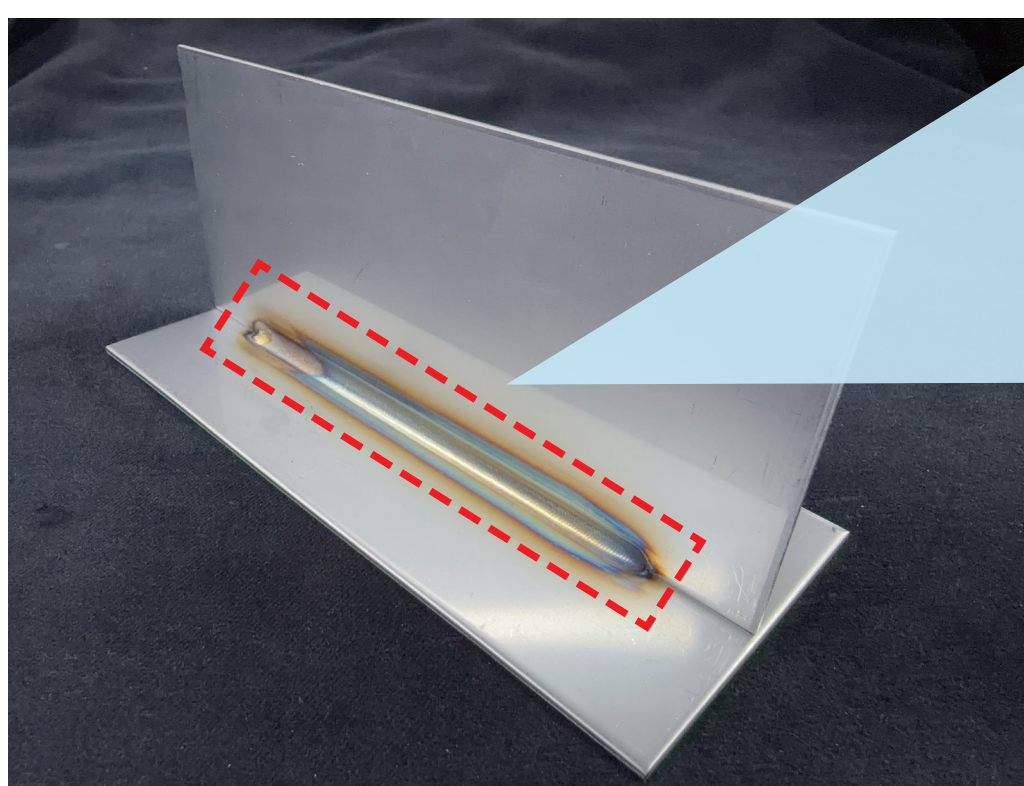

RAKURAKU TIG FILLER

Easy TIG welding, even for beginners

- **Torch height managed** by dedicated guide
- **Torch operation assisted** by filler feeding force

Supports high welding quality.

- Minimizes the effects of hand shaking to ensure attractive bead appearance and consistent penetration

Welding method/current setting: DC pulse, 120 A (average)
Shielding gas: Ar, 8 L/min
Base metal, plate thickness: Stainless steel 304, t2.0 mm
Joint shape: T joint (V groove)
