

Welding Management System: Welding Monitor

Links every welding machine in the factory.

- General-purpose unit can be connected to **any welding power supply**, including analog equipment.
- Easy installation—simply connect the power cable.

Provides visualization of welding processes.

- Simple screen indicates operating status at a glance **to support process reviews**.
- Collected data can be output as reports **to improve the efficiency of indirect tasks** such as daily work reports.

Monitoring screen (for timetable display)
