

Mobile robot capable of automatically switching tools to perform multiple tasks

Mobile Robot: VIVACE

A single unit performs multiple tasks.

- Simply switch the arm tip tool to **automatically perform multiple processes with a single unit.**
- Reduces the number of robots needed to **reduce cost and space requirements.**

Fast high-precision docking

- Proprietary mechanism allows **high-precision positioning without camera.**
- **High-speed positioning** increases productivity.

Docking station supplies both air and power.

- Power and air supplied from **multi-functional station**
- Allows **continuous operation** while charging.
